

ENERGY CONSUMPTION PLATFORM

Assignment 3

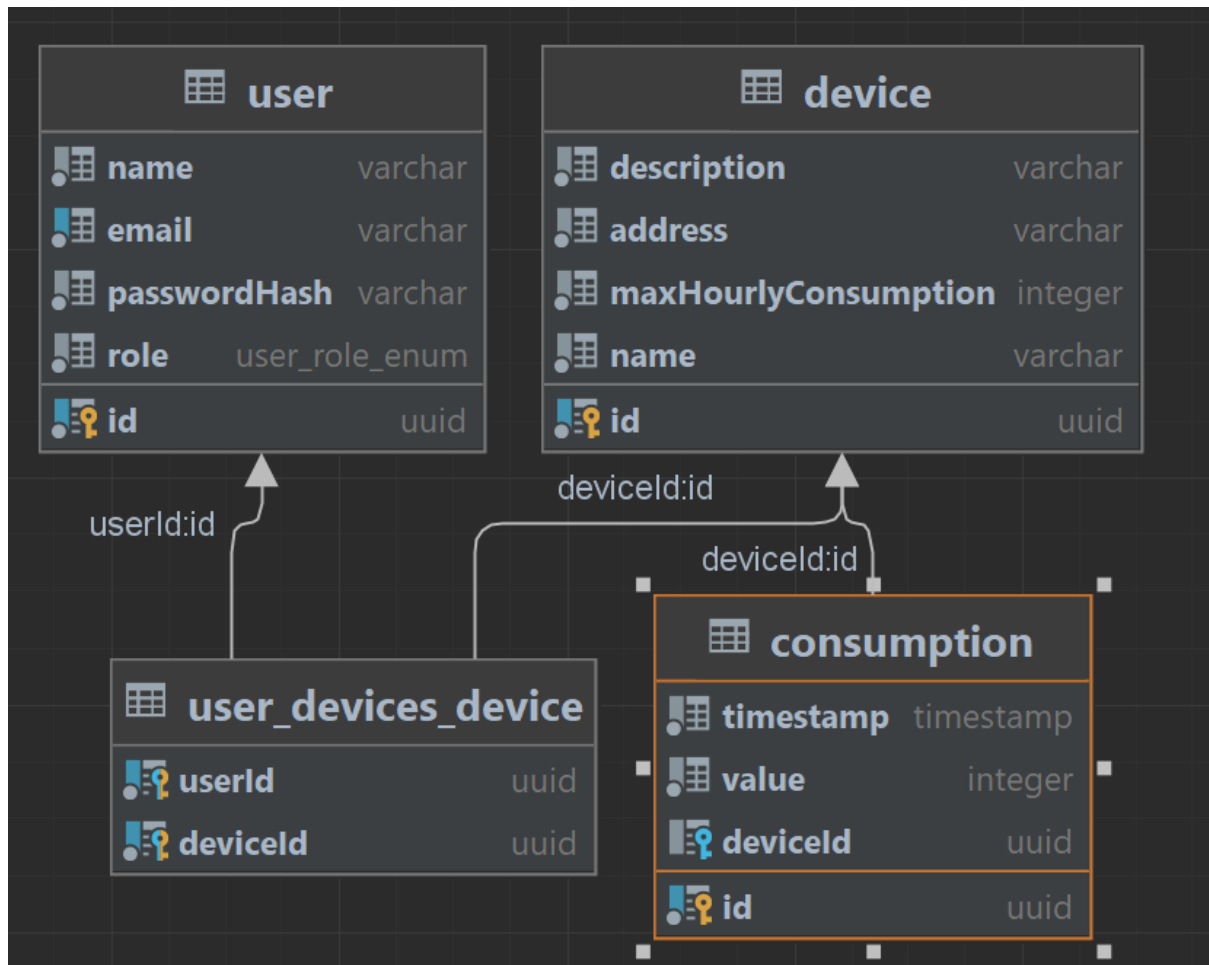

Cosmin Stretia
30442

2022

1.Application architecture

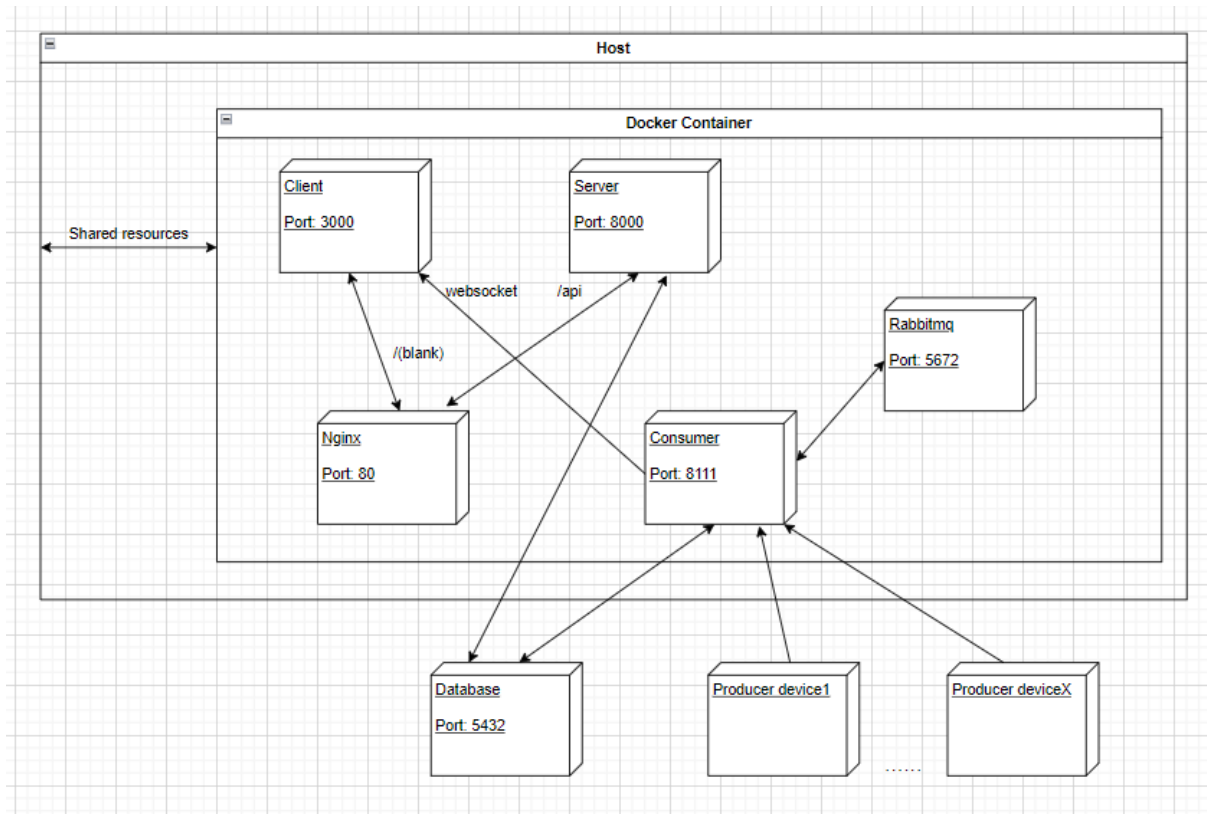

2. Database design

3. UML Deployment diagram

The deployment is done via Docker Container where the modules of our application can communicate and share resources. Those modules are the following: Client (Frontend), Server (Backend) and Postgres (Database)

4. Readme file

The instructions to run this application can be found in the Readme file in the application folder.
